

# Setting up the 'Age verification' addon

The **Age verification** addon is created in order to allow the administrator to limit the access to the categories and products by customer age.

**To set up the Age verification addon:**

1. Log in to your administration panel and open the **Administration** tab.
2. Click on the **Addons** link and enable the **Age verification** addon (change its status to **Active** in the select box on the right).

**NOTE:** After that you are able to set up the age access for every category and product.

3. Open the **Catalog** tab and click on the **Categories (Products)** link.
4. Click on the desired category (product) and open the **Addons** tab.
5. Fill in the following fields in the **Age verification** section:
  - **Age verification** - enable it.
  - **Age limit** - the age after which a customer can see the category (product).
  - **Warning message** - the text, which a customer will see if his age is less than that limit.
6. Click on the **Save** button to save the changes.

## Editing category: DVD

[English](#) | [add subcategory](#) | [add product](#) | [view products](#) | [delete this category](#)

### Age verification

Age verification:

Age limit:  years

Warning message:

### Comments and reviews

Reviews:

or [cancel](#)

Now if a customer tries to open this category (product) he will need to verify his age first.

#### **NOTE**

: Also the

#### **Birthday**

field is added to the customer profile. If a customer is logged in, his age will be automatically taken from his profile.
